Course Specific Open-Ended Responses:

What are the strengths of this course?

Comments
IDK
Challenges you to think well
Learning how to use Stata was something new that I didn't know before and it was useful to see how it works.
Collaborativeness.
This course covered material ahead of the time it would be covered in the normal class which allowed me to have a head start when we covered it in the class and exams.
the resources on canvas were very helpful and clear
was able to learn how to use stata effectively
This course was very straightforward. It was not theory heavy, which allowed us to apply statistics to economics.
Well organized, and clear objectives.
The quizzes were really level with what we were learning.
Very well organized
The resources online were very helpful, and the teacher was very good.

What would have improved your learning in the course?

Comments
Nothing. Was pretty straight forward
More time to focus on the quizzes
There could have been more effort in making the discussion section engaging, as it often felt like we were just reading the commands with little being actually taught to us.
Paying attention to the commands in class, so the quizzes are not harder to do by myself.
The course could have been improved by being a little more organized and concepts being explained better.
nothing
n/a the course was very well designed
Nothing. My learning was well supported in this class.
More practice or engagement during class.
N/A
I think it would have been helpful if there were even more online resources besides do files. It would have been nice to have a document that walked us through some of the commands and such.
